DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group I (claims 1-24) in the reply filed on December 17, 2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 25-37 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on December 17, 2004.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the embodiment wherein the center panel moves away from the container to convert the lid into the sealing position (claim 7) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing

Art Unit: 3727

sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 7 and 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 7 and 21 are considered vague and indefinite because it is unclear how the center panel converts the lid into the sealing position when it is moved away from the container.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1, 2, 4, 6-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Kriepe (U.S. 3,380,610). Kriepe teaches a lid L having a center panel 10, a rim portion 12, 28 and 22 and a hinge portion 26. The rim portion and central panel are considered to be made of relatively less-compliant polymer material because they are thicker. The pliable material of claim 4 is considered to be the tip of element 24, which is shown pliable in figure 4. The pull feature is element 32.

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claims 3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Krieps (U.S. 3,380,610) in view of Baudin (U.S. 5,865,353). Krieps discloses the claimed invention except for the relatively more-compliant polymer material being an elastomer. Baudin teaches that it is known to provide a closure with an elastomeric hinge. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the lid of Krieps with the hinge being made of an elastomer, as taught by Baudin, in order to increase the flexibility of the hinge.

10. Claims 12-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Krieps (U.S. 3,380,610) in view of Nolan (U.S. 4,616,761). Krieps discloses the claimed invention except for the barrier membrane. Nolan teaches that it is known to provide a closure with a barrier membrane. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the lid of Krieps with the barrier layers of Nolan, in order to improve the sealing properties of the closure.

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art is cited for the composite material structure.

12. THIS ACTION IS NON-FINAL.
